INTRODUCTION.

As the title indicates, this little publication is hereby introduced as a ready reference book to people who intend to make a journey to any part of the world. It gives

Railway Fares From Chicago to the principal points on this Continent, which will be found a convenient guide to the traveling public in general, and people who contemplate going abroad in any direction can easily figure out the approximate cost of a through passage by adding these railway fares to the

Ocean Rates from New York, Montreal, New Orleans and San Francisco quoted herein.

The Maps of the World and the United States though on a small scale, will answer the purpose in many instances as a useful and interesting addition to the book.

For the benefit of the sporting fraternity in this country the book gives the

Laws Regulating the Hunting and Fishing Seasons in the Northern and Western States where such sport is an attraction.

Invalids will find a chapter devoted to the

Best Known European Mineral Waters and their medical merits, and people who intend to travel abroad for pleasure will find a brief description of

European Points of Interest located in regions which seem to offer the greatest attraction at present.

The statistical tables given are in harmony with the other contents of the book.

The passage rates quoted are subject to possible changes and will be corrected in future editions. Further particulars pertaining to travel can be obtained by application to the respective companies and agencies advertised herein, or to

Help, in Case of Accidents.

Drowning. 1. Loosen clothing, if any. 2. Empty lungs of water by laying body on its stomach and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs, about twenty times a minute. Alternately raising and lowering the arm from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils and pressing the ‘Adam’s apple’ back (so as to close entrance to stomach), direct inflation can be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air and repeat the operation. 7. **DON’T GIVE UP!** Persons have been saved after **HOURS** of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give **WARM** drinks, or spirits in teaspoonfuls, fresh air and quiet.

Burns and Scalds. Cover with Cooking Soda and lay wet cloths over it. Whites of Eggs and Olive Oil, Olive or Linseed Oil, plain, or mixed with Chalk or Whiting.

Lightning. Dash cold water over a person struck.

Sunstroke. Loosen clothing. Get patient into shade and apply ice-cold water to head.

Mad Dog or Snake Bite. Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife.

Venomous Insects' Stings, etc. Apply weak Ammonia, Oil, Salt water or Iodine.

Fainting. Place flat on back, allow fresh air, and sprinkle with water.

Tests of Death. Hold mirror to mouth: if living, moisture will gather. Push pin into flesh: if dead the hole will remain, if alive it will close up.

Cinders in the Eye. Roll soft paper up like a lamp lighter and wet the tip to remove, or use a medicine dropper to draw it out. Rub the *other* eye.

Railways in Europe.

Although the American Railway System as a whole is far ahead of that in Europe as regards comfort to the traveling public, it is far from being true that railway travel on the other side of the Atlantic is void of comforts and advantages. To be sure the cars are small and without the American conveniences, but trains run invariably on time, and dangers of collisions are much smaller than in America, owing to superior roadbeds and the absence of surface crossings. The right of way is kept as trim as a lawn. The bridges and viaducts are always of stone or iron, and the stations are built to last for centuries.

On longer runs, as between Glasgow, Liverpool and London, sleepers and dining cars are in use. They are high priced, but they are accessible for all classes of passengers.

Facilities for obtaining lunches and refreshments along the lines of any railroad are excellent.

First Class Railway fares in England are high and the compartments, are no more comfortable than those of second class. Third class is counted good enough by most travelers, even by ladies. On the continent second class accommodations are good enough except in Italy, where even the first class compartments are not always attractive.

Travelers who have made up a certain route usually buy the so-called "circular tickets," as they are cheap and very convenient. On these tickets travelers can stop almost anywhere along the route and resume their journey when they see fit. They are purchased at a tourist agency and are printed in English as well as in the language of the country in which they are to be used. The rule at any European Railway Station is to show the tickets before being admitted to the train platform. Usually the conductor or guard comes around and examines tickets before the train starts.

Information for Passengers Going Abroad.

Passports are not generally necessary in Western Europe in time of peace, but if one is wanted, any steamship agent can furnish it, or a letter may be directed to the State Department in Washington, D. C., asking for passport blanks, and the requisite papers will be furnished.

Baggage. Too much baggage is a great inconvenience. A traveler for pleasure should take along only as much as is absolutely necessary. A strong trunk, 26 inches, by 18 and 15 deep, with a flat top is the most suitable. Owners name should be painted on it in full. The American checking system does not exist in Europe. Some of the Steamship Lines will check baggage as far as their own steamers run, but passengers must look after their baggage at their destinations on the European Railways.

Funds. Large amounts of money should never be carried in currency or gold. A draft is always safe. Amounts, say over five hundred dollars, should be carried in a letter of credit.

Foreign Money. The English money is a puzzle to most people who are accustomed to the decimal system. An American will generally be inclined to reduce the English coins to their equivalent in dollars and cents. If he asks the price of something and learns that it is "37 and 9" he may need a pencil to calculate that these figures amount to about \$9.43.

In Holland it is only necessary to remember that a guilder is equal to 40 Cents in United States money and the home value of all the small coins can readily be estimated.

In Germany the Mark is worth an American quarter, and a pfennig is therefore one-fourth of a cent.

In France, Switzerland and Belgium or Italy, where the Franc is the standard, it is equally easy to know what a coin is worth.

Steamer Chair. Cabin passengers will find many a comfort in owning such a chair during the voyage. They can be purchased very cheap at any Steamship Pier in New York.

Carriage-Hire in Europe is by the hour or for the course and according to tariff, which the driver must procure if asked for.

Pouboire or tip money are paid to certain classes of servants, on the Continent of Europe especially, and can hardly be avoided as it is customary and because such servants receive no other wages. But such expenditures are only to the amount of 5 to 10 cents in each instance. Services are offered by such people on the Continent at every turn. They are often a great convenience and do not cost much, but passengers unaccustomed to them will naturally find them a nuisance at first.

Ship Time.

The official time of the steamers is divided into watches of 4 hours each, commencing at 12—4, etc. The time of each watch is divided into 8 bells and is sounded or struck every half hour. The watch from 4 to 6 p. m. is divided into two watches of 2 hours each, called “dog watches”. A signal bell of one stroke is made a few minutes before change of watch.

Genoa, is a city of about 135,000 inhabitants. It is noted for its beautiful location and for its numerous palaces. This city is strongly fortified, but has no such historical art treasures as the other large Italian cities.

Other Routes.

The great exodus of pleasure seekers to Europe was for many years confined to the above points of interest, and their adjoining sections in Great Britain, France and Germany, but of late years it has been extended to a much greater area, both south and north, and it is quite a common thing the present day to meet American tourists in all parts of the Mediterranean regions during the winter and on the Scandinavian peninsula during the summer season.

Mediterranean Cruises.

The direct winter tours from New York to the Mediterranean made by some of the finest trans-atlantic steamers have become quite popular. By these passengers have been forwarded from the Metropolis of America to the cradle of the old world in the course of a couple of weeks, calling at Madeira, Gibraltar, Algiers, Genoa, Nice, Tunis, Alexandria (Cairo and the Pyramids), Jaffa (Jerusalem), Smyrna, Constantinople, Athens, Malta, Messina, Palermo, Naples, Genoa, and returning direct to New York. They have made a brief visit to the seats of the intensely interesting and ancient culture of the Grecian and Roman empires, have received a glimpse of the modern city of Cairo and the Archæological curiosities of

the Orient, enjoying at the same time the most charming winter climate in the world. Although the old Egyptian culture has left behind very few marks of historic achievements, aside from the Pyramids, there is an attractive mystic mist surrounding that region, as it forms a sanctified historical approach to the country of Biblical fame,—the land of Christ.

Scandinavian Points of Interest.

Of the new fields for Tourist travel, one of the most popular, is the region of magnificent fjords and mountains of

NORWAY,

THE LAND OF THE MIDNIGHT SUN. To people who travel exclusively for pleasure and recreation, this field offers unquestionably many great attractions, both as regards scenery climate, accomodations and economy of travel. Below we give a brief mention of some of the most frequented places of interest in Norway.

Hardanger Fjord. The grandeur and beauty of this famous inlet into the mountain ranges of Western Norway is beyond description; it must be seen in order to be appreciated. It is enclosed by rocky walls, which in some places reach up to a height of 5,000 feet, and in some places the stone walls leave a recess towards the water edge of fertile and well populated districts. The highest snowcapped mountain in this section is the "Folgefond", which is visible from many parts of the fjord. The characteristics of the rural life in this and other parts of Norway is unique and exceedingly interesting. A mighty arm of the fjord branches off at a village called Utne and is named *Særfjord*, which with constant variation of scenery and very rocky shores presents some of the finest waterfalls of the west coast.

Odde, is a village at the bottom of Hardanger Fjord and a great center for excursions to several famous waterfalls, such as Espelandsfos, Sjøggedalsfos and the magnificent glacier, the Buarbrae, a part of the Folgefond.

Molde, is a prosperous little city of wonderful scenic beauty situated on the shore of

Romsdalsfjord, another inlet of much grandeur and exhibiting shores of a most remarkable vegetation for the latitude, in a luxurious flora and beautiful woods.

North Cape, is a remarkable mountain. It is, so to say, the Northern terminus of Europe and the point where the real Arctic regions commence.

Tromsøe, is a city of about 5,000 inhabitants, pleasantly situated and presenting a beautiful and prosperous appearance. The export of fish from this place is very considerable and the harbor is generally crowded with vessels.

The tourists who reach as far north as this will have an opportunity to see the islands of Lofoten, celebrated for their great fisheries, and they will not omit to take in the magnificent sights of several other fjords, such as *Vestfjord*, *Storfjord*, *Girangerfjord* and *Sognefjord*, all of which are almost as picturesque as the *Hardanger*, though much more different in their scenic surroundings.

Bergen. This place, which is the second city in Norway in importance and population, was founded 1070 and achieved great prosperity as a member of the Hanseatic Bund. The city has a picturesque situation and many objects of interest. We will mention the churches dating back to the thirteenth century, the "Rosenkrantz Tower" and "Fiskebryggen," the ancient Hanseatic quarter. In the neighborhood is *Gulvangen*, a beautiful hamlet at the head of the fjord. From this place to Bergen is a grand overland route.

Watercure Establishments in Europe.

We give a brief description of these places. Before going to any one of them, it is advisable to consult a good physician at home, as the doctors at the respective establishments, though generally very competent, will not be much inclined to send visiting patients away, even though the waters of the place represented may not be the best for the case in question.

Achen, on Southern Rhine, is a sulphuric bath with hot springs. The water is not used internally. The springs are valuable in cases of Syphilis, Rheumatism and Skin Diseases.

Baden, near Vienna, is also a sulphuric bath. Its water is used for drinking, bathing, douche and steam baths. It is drank unmixed or with milk, and is very effective to the skin and slime tissues, and against Rheumatism, Scrofula, Venereal Diseases and Affections of the Throat.

Baden-Baden, in Baden. Its water is often drank with milk or whey, but is used mostly for baths. It is a saline water, contains much salt and is recommended for Rheumatism, Scrofula, Chronic Catarrh and Skin Diseases, but is not suitable in cases of congestions and excess of blood.

Bareges, in the Pyrenees, has 3 hot springs of water, which can only be drank on the spot. It is used against Rheumatism, Scrofula, Hypochondria, green sickness and lack of blood.

Bagneres, (de Loucheon) also in the Pyrenees, has a strong sulphuric water of high temperature, used both for drinking and bathing; but it is somewhat irritating and must be used with moderation. It is very effective against Rheumatism, Skin Diseases, Kidney Troubles and Old Sores.

Bilin, in Bohemia, is a saline bath, rich in carbonic acid and carbonate of soda. This water effects the

secretion especially the urine, hemorrhoides of the bladder, stone and gravel diseases and chronic catarrh. The water is clear and pleasant to drink..

Dreiburg, in Westphalia. This water is strongly impregnated with iron, has an acidulated, inky taste and contains free carbonic acid. It is refreshing and strenghtning. It is much used against Green Sickness, Hysterics, Nervousness and Diseases of the Spine, against Impotence and effects of Debauchery.

Eger, in Bohemia, also called Franzenbath. has 5 springs, which are rich in iron and contain an unusual amount of sulphuric salts. It is very desolving and strenghtening and used same as the Dreiburg for drinking—up to 12 goblets daily, often mixed with Ass-milk.

Ems, in Nassau. This place has a celebrated soda water, rich in sulphuric salts, is clear and little bluish in color. It is used especially against diseases of the Respiratory Organs and Hoarsness, Chronic Catarrh and Asthma. One of the springs, the Emser-Krenchan is used especially against diseases of the female Sexual Organs, irregular Menstruation, Green Sickness and sterility.

Gastein, in Austria. Its water is used mostly for bathing. It is clear as crystal and has in damp weather a somewhat rotten taste. It is much used against General Debility, Palsy, complaints of the Spine, Impotence, chronic Rheumatism, Bladder sickness, old sores and kindred diseases. The place has a fine climate, beautiful surroundings and is well patronized,

Karlsbad, in Bohemia, is one of the most frequented water-cure establishments in Europe. Its water is clear, has a salty taste and a very dissolving effect, especially on the secretions, but it is somewhat itching and must be used with moderation. Its principal substance is sulphuric salts and free carbonic acid.

The diseases for which this water is most used are Catarrh of the Stomach, Dyspepsia. Liver Complaint, Diabetes, Rheumatism, Strictures, Stone and Gravel complaints. It is not suitable in cases of Lung troubles, Syphilis, Green Sickness and Hectic Fevers.

Kisingen, in Bayern, has 3 springs, rich in iron and salts and one without iron. The water is clear and sparkling with a salty bitter taste and has much dissolving and laxative merit. It is highly beneficial to the urinary passage. It is also used much against diseases of the Digestive Organs, Dyspepsia, Scrofula, Liver Complaint, Hypochondria and Spleen.

Marienbath, in Bohemia, has a famous water. It effects the urinary passage, is laxative without weakening the system, improves digestion and is one of the mineral waters in Europe which is most used. It has much merit in cases of Catarrh of the Stomach, frequent Constipation, Dyspepsia, Hemorrhoids, Dizziness, Rheumatism and Dropsy.

Plyna, in Bohemia, has a famous bitter-salt water, excellent to drink by people who suffer from excess of blood and constipation.

Recoaro, in Lombardy, is a famous spring against diseases of the Kidneys.

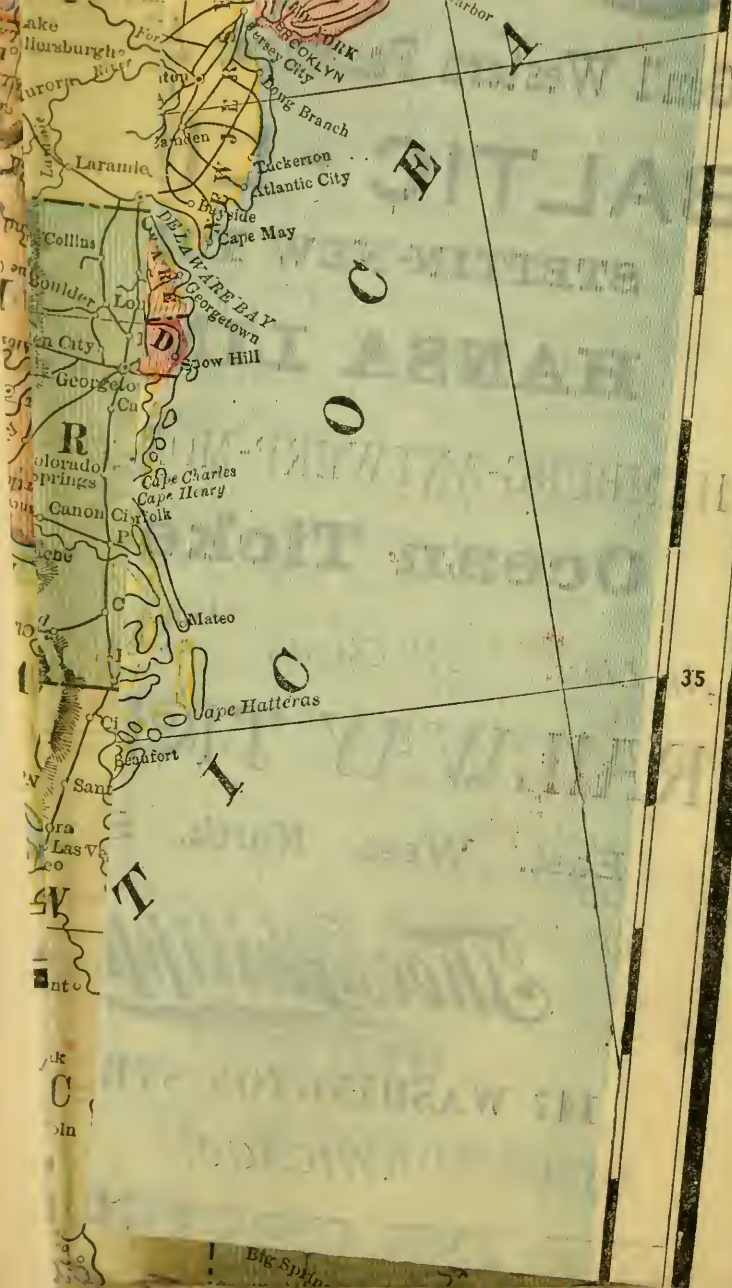

Ramlosa, in Sweden, has springs which are peculiarly rich in iron. The water is used against Green Sickness and General Debility.

Sandefjord, Norway, has excellent slambaths and salt water baths. The water at this place is strongly sulphuric and used mostly for bathing. For Nervous Debility, Chronic Catarrh. Spinal and Mercurial Diseases it is regarded as highly beneficial.
